

Ahold Delhaize delivers strong sales and earnings growth, increasing free cash flow guidance for 2018

- Net sales of €15.8 billion, up 3.6% at constant exchange rates
- US comparable sales up 3.0% (excluding hurricane up 2.5%) with positive volume growth
- Net consumer online sales up 27.6% at constant exchange rates
- Underlying operating margin of 4.1%, up 0.2% points, supported by synergies
- Net income up 26.7% to €459 million, up 26.0% at constant exchange rates
- Strong free cash flow of €538 million, up €112 million, full year guidance raised to at least €2.0 billion

Zaandam, the Netherlands, November 7, 2018 – Ahold Delhaize, one of the world's largest food retail groups and a leader in both supermarkets and e-commerce, reports a strong third quarter with improved sales across the board and strong growth of underlying operating income.

Frans Muller, CEO of Ahold Delhaize, said: "We are pleased with these results, demonstrating the strength of our great local brands, which is underpinned by their leading market positions. We are proud of the strong engagement of our 370,000 associates serving local communities and especially those that were affected by natural disasters.

"Third quarter sales rose 3.6% at constant exchange rates, while margins improved by 0.2% points to 4.1%, supported by synergies. Net consumer online sales were up 27.6%, boosted by another very strong quarter for bol.com. This puts us firmly on track to realize at least €5 billion in net consumer online sales by 2020.

"We continued to renew our store network and invest in our digital capabilities and new technologies to make shopping easier for customers, while offering them even more options to live healthier lives. In the U.S., Stop & Shop remodeled all its stores in the Hartford area, as the first phase of its repositioning program. In the Netherlands, Albert Heijn to go opened its first checkout-free stores, offering customers super-fast shopping without waiting in line. Delhaize Belgium became our latest brand to provide customers with at-a-glance guidance on the nutritional quality of own brand products.

"In the United States, comparable sales grew significantly by 3.0% compared to the previous quarter, excluding gasoline, with positive volume growth. Comparable sales were up 2.5% adjusted for the impact of extreme weather events on the performance of Food Lion. Online sales rose 11.8%, supported by improving sales trends at Peapod.

"In the Netherlands, performance was very strong with comparable sales up 5.9%. Net consumer online sales grew 33.2% as bol.com continued its rapid growth as the leading e-commerce platform in the Benelux. In Belgium, Delhaize grew sales and margins as the implementation of its new strategy and improvement plans continued to make steady progress. In Central and Southeastern Europe, we are particularly pleased by the performance of our Czech business. Sales in the segment were impacted by negative comparable sales in Greece, which we expect to improve during the fourth quarter of 2018.

"Free cash flow was €538 million and we expect free cash flow this year to be at least €2.0 billion, exceeding our previous guidance of €1.9 billion. Our strong cash generation enables us to provide a balance between investing in further growth of our business, while at the same time returning excess liquidity to shareholders through our share buyback program in 2018.

"Ahold Delhaize will provide an update on our strategy at the Capital Markets Day on November 13 in New York City. We're excited to share our plans on e-commerce and digital in the U.S. and Europe and on the repositioning program at Stop & Shop along with further plans to drive growth in the years ahead as we continue the expansion of the leading position of our great local brands."

In the third quarter of 2018, net sales in the United States grew by 3.2% at constant exchange rates to €9,612 million. Comparable sales excluding gas increased by 3.0%, with positive volume growth in the quarter. The incremental impact on comparable sales growth of Hurricane Florence was estimated at 0.5% points for the segment, resulting in adjusted comparable sales growth of 2.5%. Online sales increased by 11.8% at constant exchange rates to €185 million, supported by improving sales trends at Peapod.

Stop & Shop unveiled a fresh new look starting for its 21 stores in the Hartford area in Connecticut. The new look comes with a \$70 million capital investment to improve the in-store experience with a focus on delivering more fresh, fast, local and healthy options. The changes include a modernized store format

and a new logo, which is a nod to the brand's past and its legacy of leading in convenience. Learnings from this first wave will be implemented during the further rollout in other markets next year.

Food Lion has now rolled out the Easy, Fresh and Affordable format to 712 of its 1,029 stores, including 168 stores in Virginia's Norfolk and greater Roanoke markets this year.

Retail Business Services held a ceremony to break ground for a new 200,000 square-foot, state-of-theart meat processing facility. The new facility will create more than 700 food manufacturing and distribution jobs in Rhode Island and account for more than \$100 million of investment in the state.

Underlying operating margin in the U.S. was 4.1%, up 0.2% points from the same quarter last year. The higher margin was driven by higher gross margins mainly as a result of synergies and improved promotional efficiency, partly offset by higher underlying expenses, including onetime costs as a result of Hurricane Florence.

The Netherlands

Net sales in the Netherlands of €3,469 million increased by 5.8% compared to the previous year. Comparable sales grew by 5.9%. Comparable sales growth excluding bol.com was 4.2%.

Albert Heijn to go started to roll out its first checkout-free stores in the quarter, offering busy customers super-fast shopping and no more waiting in line. Customers can pay right at the shelf with a "tap to go" card or using an app on their Android phone. Albert Heijn plans to roll out the technology to all its 80 Albert Heijn to go convenience stores, making it available for tens of thousands of customers each day.

Albert Heijn has taken the next step in offering transparency to customers by using blockchain technology to make the production chain of its own-brand products more transparent. Through a QR code on the packaging, they can, for example, track the entire route traveled by a bottle of orange juice from the grove to the store shelf, with more products being added in the near future.

Bol.com and ah.nl continued their strong sales performance. Net consumer online sales increased by 33.2% compared to last year. Albert Heijn and bol.com are offering an even better online shopping experience for customers including a single sign-on and combined subscription model. Both brands also started to sell the Dutch-language Google Home device.

The underlying operating margin in the Netherlands was 5.1%, up 0.2% points compared to the same quarter last year. The margin excluding bol.com was 5.7%, which was up 0.2% points compared to last year mainly driven by lower operational expenses as a result of cost saving programs.

Net sales in Belgium were €1,226 million, up 1.0% versus the same quarter last year. Comparable sales increased by 0.6% points, adversely impacted by calendar effects. The online sales growth of delhaize.be for the quarter was 18.0%.

Delhaize introduced the Nutri-Score food label, which is a visual that summarizes food nutrition information, helping customers understand complex nutrient tables more easily to make balanced food choices and quickly compare products. Customers will find the Nutri-Score label on all Delhaize own-brand fresh soups, cereals, yogurt and prepared meals. Delhaize's goal is to provide all own-brand products with the label within two years.

Delhaize opened the first five remodeled stores based on a new format reflecting the brand's updated positioning in the quarter. A highlight of the new concept store in Nivelles is the "Fresh Atelier" that offers freshly prepared ready-to-eat meals, using recipes that contribute to a balanced diet.

Underlying operating margin in Belgium was 3.2%, up 0.2% points compared to last year. The improvement was mainly driven by an improved gross profit margin, supported by synergies.

Central and Southeastern Europe (CSE)

Net sales in Central and Southeastern Europe increased by 3.0% at constant exchange rates to €1,473 million. Net sales growth in the third quarter resulted from comparable sales growth of 0.6%, and the net addition of 123 stores, of which most were convenience stores. Romania and the Czech Republic reported strong growth. In Greece, comparable sales growth remained negative, although sales trends improved compared to the previous quarter.

In the Czech Republic, Albert has created a new urban supermarket concept featuring fresh, healthy foods and a fast, easy shopping experience. The wide assortment of fresh and healthy products includes many items from local suppliers.

CSE's underlying operating margin was 3.7%, down 0.6% points versus last year, mainly due to the impact of lower sales in Greece and higher labor costs in the rest of the region.

Underlying Global Support Office costs were €19 million, €9 million lower than the prior year. Excluding insurance results, underlying costs were €33 million compared to €35 million in Q3 2017, due to synergies.

Synergy savings

Ahold Delhaize remains committed to delivering net synergies of \in 500 million in 2019, resulting from the integration of the two companies. Total identified gross synergies are \in 750 million, of which more than \notin 250 million will be reinvested in our brands.¹ The expected synergies are to be delivered in addition to the "save for our customers" programs in the brands. At the end of the quarter, net cumulative synergies amounted to \notin 312 million, an increase of \notin 127 million compared to the same period last year. The increase is mainly driven by our buying activities across all parts of the Group.

In the third quarter of 2018, the following net synergy savings have been delivered:

€ million	Q3 2018	Q3 2017	Q3 YTD 2018	Q3 YTD 2017
The United States	77	36	210	108
Europe	24	22	73	53
Global Support Office	12	10	29	24
Ahold Delhaize Group	113	68	312	185

Operating income in the third quarter included €17 million (Q3 2017: €42 million) of integration costs.

1. Amounts are based on HY1 2017 exchange rates.

Financial review

Third quarter 2018 (compared to third quarter 2017)

Operating income increased by €67 million to €612 million, which can be explained by:

The change in adjustments to operating income compared to Q3 2017 includes the decrease in restructuring and related charges (\in 33 million) and the decrease in impairments (\in 1 million), offset by the decrease in gains on sale of assets (\in 23 million).

Management report

To arrive at underlying operating income of €647 million (up €56 million over Q3 2017), operating income is adjusted for impairments of €10 million and restructuring and related charges of €27 million.

The restructuring and related charges of €27 million mainly included integration costs and €8 million of additional losses from a hurricane in the United States that are expected to be reimbursed from insurance coverage.

Income from continuing operations was €475 million; which was €113 million higher than last year. This follows from the increase in operating income of €67 million, lower income taxes of €47 million, higher financial expenses of €2 million and higher income from joint ventures of €1 million.

Free cash flow of €538 million increased by €112 million compared to Q3 2017. This increase is mainly driven by:

- Increased cash flows from operations of €44 million;
- Improvement in working capital of €79 million;
- Lower income taxes paid of €73 million;
- Lower divestment of assets of €62 million;
- Higher purchases of non-current assets of €18 million.

Net debt increased in Q3 2018 by €158 million to €3,357 million, which is mainly a result of the share buyback of €686 million, partly offset by our free cash flow of €538 million.

First three quarters 2018 (compared to first three quarters 2017)

Operating income increased by €107 million to €1,768 million. Recorded in operating income are:

- Restructuring and related charges of €77 million (Q3 YTD 2017: €173 million);
- Impairments of €21 million (Q3 YTD 2017: €35 million);
- Gain on the sale of assets of €3 million (Q3 YTD 2017: €44 million).

These total €95 million (Q3 YTD 2017: €164 million) and are adjusted to arrive at underlying operating income of €1,863 million (Q3 YTD 2017: €1,825 million).

Income from continuing operations was \in 1,292 million, which was \in 219 million higher than last year. This reflects the increase in operating income of \in 107 million, lower income taxes of \in 99 million and lower net financial expenses of \in 18 million, partially offset by lower income from joint ventures of \in 5 million.

Free cash flow was €1,672 million, €649 million higher than last year. The increase is mainly due to the improvement in changes in working capital of €377 million, lower capital expenditures of €131 million and lower income taxes paid of €196 million, partially offset by lower cash from divestments of €108 million.

Outlook

We confirm our target for 2018 of realizing €420 million net synergies, including €268 million realized in 2017, and we remain confident to reach €750 million of gross synergies for 2019, of which more than €250 million will be reinvested in addition to our "save for our customers" savings.

We expect free cash flow in 2018 to exceed our previous guidance of €1.9 billion and to be at least €2.0 billion. Capital expenditure is expected to be €1.8 billion in 2018, compared to our previous guidance of €1.9 billion.

Notes to the consolidated summary financial statements

1. The Company and its operations

The principal activity of Koninklijke Ahold Delhaize N.V. ("Ahold Delhaize" or the "Company" or "Group" or "Ahold Delhaize Group"), a public limited liability company with its registered seat and head office in Zaandam, the Netherlands, is the operation of retail food stores and e-commerce primarily in the United States and Europe.

The information in these condensed consolidated interim financial statements ("financial statements") is unaudited.

2. Accounting policies

Basis of preparation

These financial statements have been prepared in accordance with IAS 34 "Interim Financial Reporting." The accounting policies applied in these financial statements are consistent with those applied in Ahold Delhaize's 2017 consolidated financial statements, except as otherwise indicated below.

Taxes on income in the interim periods are accrued for using the tax rate that is expected to be applicable to the total annual profit or loss.

Ahold Delhaize's reporting calendar in 2018 and 2017 is based on a 4/4/5-week calendar, with four equal quarters of 13 weeks, for a total of 52 weeks.

Segmentation

Ahold Delhaize's operating segments are its retail operating companies that engage in business activities from which they earn revenues and incur expenses and whose operating results are regularly reviewed by the Executive Committee to make decisions about resources to be allocated to the segments and to assess their performance. In establishing the reportable segments, certain operating segments with similar economic characteristics have been aggregated. As Ahold Delhaize's operating segments offer similar products using complementary business models, and there is no discernible difference in customer bases, Ahold Delhaize's policy on aggregating its operating segments into reportable segments is based on geography, functional currency and management oversight.

As of the first quarter of 2018, the previous Ahold USA and Delhaize America segments are combined into one reporting segment, "The United States."

New and revised IFRSs effective in 2018:

IFRS 9, "Financial Instruments"

IFRS 9 addresses the classification, measurement and recognition of financial assets and financial liabilities. The adoption of the new standard has the following effects on the financial assets and liabilities on January 1, 2018.

The majority of the Company's debt instruments that were measured at amortized cost satisfy the conditions to be classified at amortized costs under IFRS 9, so there is no change in how we account for these assets. However, certain investments in U.S. Treasury bond funds that were classified as available-for-sale financial assets do not meet the criteria to be classified as either at fair value through other comprehensive income (FVOCI) or at amortized cost and €157 million has been reclassified to financial assets at fair value through profit or loss (FVPL). Related fair value losses of €3 million were transferred from the available-for-sale financial assets reserve to retained earnings on January 1, 2018. There were no other changes to the classification and measurement of other financial assets.

There is no effect on the Group's accounting for financial liabilities. The new requirements only affect the accounting for financial liabilities that are designated at fair value through profit or loss. For the Group, only derivatives and reinsurance liabilities are designated at fair value through profit or loss and there are no changes in the accounting for these liabilities as a result of IFRS 9. The derecognition rules have not changed from IAS 39, "Financial Instruments: Recognition and Measurement."

The new hedge accounting rules align the accounting for hedging instruments more closely with the Group's risk management practices. As a general rule, more hedge relationships could be eligible for hedge accounting, as the standard introduces a more principles-based approach. The Company has assessed that its current hedge relationships will qualify as continuing hedges upon the adoption of IFRS 9.

The new impairment model requires the recognition of impairment provisions based on expected credit losses rather than only incurred credit losses as is the case under IAS 39. It applies to financial assets measured at amortized cost, debt instruments measured at FVOCI, contract assets under IFRS 15, "Revenue from Contracts with Customers," lease receivables, loan commitments and certain financial guarantee contracts. Due to the change in the impairment model the loss allowance for the financial receivables increased by €1 million at January 1, 2018.

IFRS 9 applies for annual periods beginning on or after January 1, 2018. The Company applies the new rules retrospectively from January 1, 2018, applying the practical expedients permitted under the standard. Comparatives for 2017 have not been restated.

IFRS 15, "Revenue "from Contracts with Customers"

IFRS 15 establishes a single comprehensive model for entities to use in accounting for revenue from contracts with customers. IFRS 15 supersedes the previous revenue recognition guidance, including IAS 18, "Revenue," IAS 11, "Construction Contracts," and the related interpretations. Under IFRS 15, an entity recognizes revenue when (or as) a performance obligation is satisfied, i.e., when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

The majority of the Company's revenue is derived from sales of retail products whereby control is transferred to the customer as purchases occur at the register. For goods shipped to customers, control transfers to the customer when the product is delivered and accepted. The Company previously recognized revenue as control passed and the adoption of IFRS 15 has no effect on when revenue is recognized.

The Company's policy is to allow customers to return product for replacement or refund. Revenue was previously recognized with an allowance for a reasonable estimate of the returns that can be made for a refund and this remained unchanged after adoption of IFRS 15. However, under IFRS 15, the Company is now required to recognize an asset that represents the right to receive returned product. The value of this asset represents the purchase cost of only the goods that will be of value to Ahold Delhaize. A returned product has value to Ahold Delhaize if it can be restocked for future resale or returned to the vendor for a refund. Based on the limited amount of sales that result in refunds to customers, the value of this new asset was €1 million at January 1, 2018.

IFRS 15 applies for annual periods beginning on or after January 1, 2018. The Company applies the new rules retrospectively from January 1, 2018, with the cumulative effect of initially applying the standard recognized as of that date. Comparatives for 2017 have not been restated.

New accounting policies not yet effective for 2018

The IASB issued several standards, or revisions to standards, that are not yet effective for 2018, but will become effective in coming years. For the assessment of the effects of these standards, refer to the description in Ahold Delhaize's Annual Report 2017.

One of these standards is IFRS 16, "Leases", which is an important upcoming accounting change for the Company. This standard will replace existing lease guidance.

Our work on implementing this new standard for leases is progressing and we continue to consider the implications of the standard on our Group's consolidated results and financial position. The Company completed the data collection and enrichment process of its lease contracts and is currently implementing a lease accounting tool to determine the impact assessment on a contract by contract basis to prepare for the transition at January 1, 2019.

The Company will adopt IFRS 16 on January 1, 2019, and will apply the full retrospective transition approach.

3. Business combinations and goodwill

Ahold Delhaize completed various store acquisitions for a total purchase consideration of €13 million. The allocation of the fair values of the identifiable assets acquired, liabilities assumed and the goodwill arising from the acquisitions through Q3 2018 are as follows:

€ million	Store acquisitions

4. Segment reporting

Ahold Delhaize's retail operations are presented in four reportable segments. In addition, "Other retail," consisting of Ahold Delhaize's unconsolidated joint ventures JMR - Gestão de Empresas de Retalho, SGPS, S.A. ("JMR") and P.T. Lion Super Indo ("Super Indo"), as well as Ahold Delhaize's Global Support Office, are presented separately. The accounting policies used for the segments are the same as the accounting policies used for the consolidated financial statements as described in *Note 2*.

All reportable segments sell a wide range of perishable and non-perishable food and non-food consumer products.

7. Income taxes

The decrease in income tax expense and the effective tax rate for Q3 2018 is mainly caused by the reduction of the U.S. and Belgian statutory tax rates. Further, the effective tax rate of Q3 2018 is relatively low due to one-time events, including return to provision adjustments.

8. Equity attributable to common shareholders

Dividend on common shares

On April 11, 2018, the General Meeting of Shareholders approved the dividend over 2017 of €0.63 per common share. This dividend was paid on April 26, 2018.

Share buyback 2018

On January 2, 2018, the Company commenced the €2 billion share buyback program that was announced on November 8, 2017. During 2018, 83,846,708 of the Company's own shares were repurchased at an average price of €19.63 per share. The program is expected to be completed before the end of 2018.

The number of outstanding common shares as of September 30, 2018, was 1,146,490,634 (December 31, 2017: 1,227,589,734).

9. Cash

The following table presents the reconciliation between the cash and cash equivalents as presented in the statement of cash flows and on the balance sheet:

Issuance of €800 million dual tranche debt offering of fixed rate notes and floating rate notes

On March 19, 2018, Ahold Delhaize issued €500 million fixed rate notes due in 2026 and €300 million floating rate notes due in 2021. The 8-year fixed rate notes bear a coupon of 1.125% per annum and were issued at a price of 99.107% of the nominal value. The 3-year floating rate notes bear a coupon of 18 basis points over 3-month EURIBOR per annum and were issued at a price of 100.449% of the nominal value. The net proceeds from the offering will be used for the refinancing of existing debt and for general corporate purposes.

Financial assets and liabilities measured at fair value on the balance sheet

Of Ahold Delhaize's categories of financial instruments, only derivatives, investments in debt instruments and reinsurance assets (liabilities) are measured and recognized on the balance sheet at fair value. These fair value measurements are categorized within Level 2 of the fair value hierarchy. The Company uses inputs other than quoted prices that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices). The fair value of derivative instruments is measured by using either a market or income approach (mainly present value techniques). Foreign currency forward contracts are measured using quoted forward exchange rates and yield curves derived from quoted interest rates that match the maturity of the contracts. Interest rate swaps are measured at the present value of expected future cash flows. Expected future cash flows are discounted by using the applicable yield curves derived from quoted interest rates.

To the extent that no cash collateral is contractually required, the valuation of Ahold Delhaize's derivative instruments is adjusted for the credit risk of the counterparty, called Credit Valuation Adjustment (CVA), and adjusted for Ahold Delhaize's own credit risk, called Debit Valuation Adjustment (DVA). The valuation technique for the CVA / DVA calculation is based on relevant observable market inputs.

No CVA / DVA adjustments are made to the valuation of certain derivative instruments, for which both Ahold Delhaize and its counterparties are required to post or redeem cash collaterals if the value of a derivative exceeds a threshold defined in the contractual provisions. Such cash collaterals materially reduce the impact of both the counterparty and Ahold Delhaize's own non-performance risk on the value of the instrument. The portion of outstanding derivatives that was collateralized is specified as

follows:

€ million	September 30, 2018	
Cross-currency interest rate swaps	18	18
Total net derivative liabilities subject to collateralization	18	18
Collateralized amount	_	_

The carrying amount of trade and other (non-)current receivables, cash and cash equivalents, accounts payable, short-term deposits and similar instruments, and other current financial assets and liabilities approximate their fair values because of the short-term nature of these instruments and, for receivables, because any expected recoverability loss is reflected in an impairment loss. The fair values of quoted borrowings for which an active market exists are based on quoted prices at the end of the reporting period. The fair value of other non-derivative financial assets and liabilities that are not traded in an active market are estimated using discounted cash flow analyses based on prevailing market rates.

The fair value of the cumulative preferred financing shares is measured as the present value of expected future cash flows. Such cash flows include the dividend payments and the payments of the nominal value, plus paid-in capital. Expected future cash flows are discounted by using the yield curves derived from quoted interest rates and Credit Default Swap rates that match the maturity of the contracts. The conditions for redemption and conversion of the cumulative preferred financing shares are disclosed in *Note 22* of Ahold Delhaize's 2017 consolidated financial statements. The accrued interest is included in other current financial liabilities and not in the carrying amounts of non-derivative financial assets and liabilities.

11. Commitments and contingencies

A comprehensive overview of commitments and contingencies as of December 31, 2017, is included in *Note 34* of Ahold Delhaize's 2017 consolidated financial statements, part of Ahold Delhaize's Annual Report 2017 dated February 27, 2018.

During 2018, Tops Markets, a former subsidiary of Ahold, filed for bankruptcy protection. As part of the legal proceedings Tops Markets provided an update on options that they exercised to extend the lease terms of a number of real estate leases, for which Ahold Delhaize has guaranteed payments to the landlords. These extensions could increase our gross exposure on our issued lease guarantees by an amount of €250 million. Ahold Delhaize will vigorously challenge whether its guarantee includes these extensions if it is called upon to satisfy its obligations under the outstanding lease guarantee. In addition, Ahold Delhaize has several remediation options, if necessary, to reduce our gross exposure.

As part of the bankruptcy proceedings, Tops Markets has abandoned five stores whose rent are guaranteed by Ahold Delhaize. The Company has also reached an agreement with Tops Markets to continue the rent for nine locations for 72 months. These actions have resulted in Ahold Delhaize recognizing an onerous contract liability of €23 million, which is presented as an after-tax loss from discontinued operations of €16 million.

12. Subsequent events

There have been no significant subsequent events from the end of the quarter up to the publication date of these interim financial statements.
