Q2 2025 Report

Issued on August 6, 2025

## Ahold Delhaize reports solid Q2 performance driven by sales growth; 2025 outlook reiterated

- \* Our Growing Together strategy ensures we deliver real value every day for our brands' customers through targeted investments in pricing, own-brand assortments and loyalty programs, as customers continue to feel pressure on their household budgets. Initiatives like these are strengthening our customer value propositions and driving sustainable, long-term omnichannel growth.
- \* In the first half of 2025, we already achieved a key milestone by reaching e-commerce profitability on a fully allocated basis. This underscores the strength and scalability of our omnichannel model, which is a key long-term driver of market share growth.
- \* Q2 net sales were €23.1 billion, up 6.5% at constant exchange rates and up 3.3% at actual exchange rates. Net sales were positively impacted by 3.4 percentage points at constant exchange rates from the acquisition of Profi and negatively impacted by 1.2 percentage points from the closure of Stop & Shop stores and the cessation of tobacco sales in the Netherlands and Belgium.
- \* Q2 comparable sales excluding gasoline increased by 4.0%, up 3.4% in the U.S. and 4.9% in Europe. Comparable sales excluding gasoline were positively impacted by 0.9 percentage points in the U.S. and by 0.7 percentage points in Europe, due to calendar shifts. Europe was negatively impacted by 1.6 percentage points due to tobacco.
- \* Our investments in expanding our omnichannel infrastructure and enhancing our digital loyalty programs are yielding strong results. Ahold Delhaize online sales increased by 14.4% in Q2 at constant exchange rates and 11.8% at actual exchange rates. This was driven by double-digit growth in online grocery in both regions and a strong performance at bol.
- \* Q2 underlying operating margin was 4.0%, a decrease of 0.2 percentage points at constant exchange rates. Strong performance in Europe was offset by the impact of the first-time consolidation of Profi and strategic U.S. price investments to accelerate growth.
- \* Q2 IFRS operating income was €861 million and IFRS-diluted earnings per share (EPS) was €0.60. IFRS operating income was €56 million lower than underlying operating income.
- \* Q2 diluted underlying EPS was €0.65, an increase of 0.7% compared to the prior year at actual rates.
- \* 2025 interim dividend is €0.51 (2024: €0.50), based on the Group's interim dividend policy.
- \* The Company reiterates its 2025 full-year outlook for underlying operating margin of around 4%; free cash flow of at least €2.2 billion; and gross capital expenditures of around €2.7 billion. Diluted underlying EPS is expected to grow at a mid- to high-single-digit rate, based on an average euro/U.S. dollar exchange rate for the full year of 1.10. Diluted underlying EPS results at actual rates are subject to dollar volatility.

# Comments from Frans Muller, President and CEO of Ahold Delhaize

"I am pleased to report solid second quarter performance, with strong sales growth supported by positive volumes in both regions. In an environment where customers prioritize value and convenience, our Growing Together strategy stands out as a key strength. Our brands' unwavering commitment to delivering exceptional customer value has enabled us to maintain or improve our market positions and continue to drive momentum in growth. At the same time, through strong operational execution by our teams and associates, we delivered a healthy and stable underlying operating margin of 4.0% and IFRS operating income of €861 million.

"During the quarter, group net sales increased 6.5% at constant rates (3.3% at actual rates) and comparable sales growth excluding gasoline was 4.0%. Net group sales were positively impacted by 3.4 percentage points from the Profi acquisition and negatively impacted by 1.2 percentage points from the closure of Stop & Shop stores and the cessation of tobacco sales in the Netherlands and Belgium.

"In the U.S., net sales increased 1.9% at constant rates (decreased 3.1% at actual rates), while comparable sales growth excluding gasoline increased 3.4%, positively impacted by 0.9 percentage points from calendar shifts. All of our U.S. brands have now launched price investments, while strategically leveraging the strength of our own-brand portfolios. So far this year, we have introduced 300 new own-brand products and seen sales growth outpace the rest of the store in both dollars and units. It has also been one year since we announced decisive and deliberate actions to ensure a stable and thriving future for Stop & Shop. We are encouraged by customers' response to the initiatives we have implemented thus far. Where we have made investments, we are attracting new customers and seeing increasing volumes and an improving net promoter score.

"In Europe, our growth trajectory has been remarkable. Net sales increased 13.4% at constant rates (13.3% at actual rates), including the impact of Profi, while comparable sales excluding gasoline increased 4.9%, despite the net negative impact from tobacco and calendar shifts of 0.9 percentage points. This extends a period of impressive performance, as our teams drive innovation and adapt swiftly to evolving consumer trends. Bol grew 12.5%. We are making great progress on two key strategies at this brand: international partner expansion, through which we have already onboarded around 300 high-quality international partners so far this year, and the expansion of our advertising services, which have grown over 30% during the quarter. We are also making good progress with the integration of Profi, which has significantly contributed to our revenue growth in Europe and strengthened our market position within Romania.

"During the first half of the year, we already achieved a key milestone by reaching e-commerce profitability on a fully allocated basis. This underscores the strength and scalability of our omnichannel model, which is an important long-term driver of market share growth. Our improved online profitability is the result of several key factors, including our orientation towards less asset-intense same-day delivery models, increasing fulfilment capacity, automating operations and leveraging retail media propositions. It is particularly encouraging to see that, more and more, customers are finding value in the convenience and flexibility of our brands' omnichannel offerings. During the quarter, online sales grew 14.4%, marking the fifth consecutive quarter of double-digit growth. We also expanded our e-commerce market share in both regions. This quarter, we completed the rollout of PRISM, our proprietary e-commerce platform, at Food Lion, with plans to extend it to Hannaford in the second half of the year. Delhaize has doubled its e-commerce capacity in Belgium with a new distribution center in Vorst. At Albert Heijn, our proposition for B2B customers has paid off, with sales and orders increasing by over 10%.

"Our success is driven by the dedication of more than 390,000 associates who serve over 72 million customers weekly. Their hard work and commitment are at the core of our brands' operations and community engagement. To support associates, our brands are investing in technology to simplify their ways of working and make their jobs easier. Most of our European brands have introduced Al-driven assistants, including MaxiGPT in Serbia, LionGPT at Delhaize, Albot at Albert and De Assistent at Albert Heijn. These Al solutions ensure associates have easy access to the right information so they can help customers better and faster. Albert is rolling out Al technology that helps cashiers quickly identify unpackaged items, shortening the checkout process, improving accuracy, and making the work easier. In the U.S., we have rolled out updates to our Spectrum proprietary technology to simplify and modernize order management for online fulfilment.

"In the first half of 2025, we made good progress on our performance in the areas of healthy food sales,  $CO_2e$  emissions and food waste. This year, our brands are putting a key focus on expanding the offering of healthy and sustainable food options for our customer base. Through innovation and creative solutions, I am convinced we can achieve a lot. A good example of this in the most recent quarter was Albert Heijn's introduction of 15 new products that combine both animal-derived and plant-based ingredients. This mix provides a familiar taste and texture, along with improved nutritional values (such as lower saturated fat content) and lower  $CO_2e$  emissions. To reduce food waste, Albert has been actively promoting its initiative to upcycle unsold products, for example, transforming ripe bananas into banana bread.

"Our focus on striking the right balance between investing in growth and creating opportunities to drive operational excellence continue to fuel the positive outlook for our company. With our strong culture – known for its agility, consistency, ability to drive transformative change and commitment to sustainability – I am confident we are well prepared to navigate the complexities of the current business environment and position the company to drive brand strength and market share growth in the coming periods."

#### **Outlook**

Following the first half of the year, Ahold Delhaize reiterates its 2025 outlook. Underlying operating margin is expected to be around 4%; free cash flow is expected to be at least €2.2 billion; and gross capital expenditures are planned at around €2.7 billion. Diluted underlying EPS is expected to grow at a mid- to high-single-digit rate, based on an average euro/U.S. dollar exchange rate for the full year of 1.10. Diluted underlying EPS results at actual exchange rates are subject to dollar volatility.

The following are changes in the business that will impact comparable performance for 2025 and that have been incorporated into our Outlook:

- The acquisition of Profi closed on January 3, 2025, and is expected to add around €3 billion in net sales
- The closure of underperforming Stop & Shop stores was completed in 2024. The estimated net impact to 2025 reported net sales from these closures is between \$550 and \$575 million.
- The cessation of tobacco sales will impact Albert Heijn's net sales at franchised stores for the first half of the year. In addition, Delhaize and Albert Heijn stores in Belgium ended tobacco sales as of April 1, 2025, due to regulation changes. This will have around a 1.0 percentage-point impact on reported and comparable store sales in Europe in 2025.

#### Financial review

#### Q2 2025 (compared to Q2 2024)

Underlying operating income decreased by €15 million to €917 million, and was adjusted for the following items, which impacted reported IFRS operating income by €(56) million:

- Impairments of €44 million (Q2 2024: €31 million)
- (Gains) and losses on leases and the sale of assets of €(5) million (Q2 2024: €77 million)
- Restructuring and related charges and other items of €17 million (Q2 2024: €35 million)

The impairments mainly relate to operating stores in the U.S. The loss on leases and the sale of assets in Q2 2024 mainly relate to losses recognized on the sale of stores to franchisees in Belgium. Restructuring and related charges and other items mainly includes acquisition and integration costs related to the Profi acquisition. Including these items, IFRS operating income increased by €71 million to €861 million.

Income from continuing operations was €548 million, representing an increase of €50 million compared to last year. This was driven by a €71 million increase in operating income, lower income taxes of €6 million and a higher share in income from joint ventures of €1 million, partially offset by higher net financial expenses of €29 million.

Free cash flow was €517 million, representing an increase of €139 million compared to Q2 2024. This change is due to an increase in operating cash flows of €213 million and an increase in dividends received from joint ventures of €4 million, offset by an increase in net investments of €57 million, higher net lease repayments of €7 million and higher net interest paid of €14 million.

Net debt remained stable at €15.5 billion (decreased by €12 million) compared to Q1 2025. Dividends paid of €611 million and share buyback of €337 million were offset by a positive free cash flow of €517 million and foreign exchange and other impacts on net debt of €443 million.

#### Half year 2025 (compared to half year 2024)

Underlying operating income increased by €13 million to €1,807 million and was adjusted for the following items, which impacted reported IFRS operating income:

- Impairments of €53 million (HY 2024: €47 million)
- (Gains) and losses on leases and the sale of assets of €(16) million (HY 2024: €112 million)
- Restructuring and related charges and other items of €30 million (HY 2024: €42 million)

The impairments mainly relate to operating stores in the U.S. The gains on leases and the sale of assets mainly relate to lease terminations in the U.S. The loss on leases and the sale of assets in HY 2024 mainly relate to losses recognized on the sale of stores to franchisees in Belgium. Restructuring and related charges and other items mainly includes acquisition and integration costs related to the Profi acquisition. Including these items, IFRS operating income increased by €148 million to €1,741 million.

Income from continuing operations was €1,103 million, representing a increase of €91 million compared to last year. This was driven by a €148 million increase in operating income, partially offset by higher net financial expenses of €42 million, higher income taxes of €12 million and a lower share in income from joint ventures of €3 million.

Free cash flow was €715 million, representing a decrease of €39 million compared to last year. This change is due to an increase in operating cash flows of €315 million and an increase in dividends received from joint ventures of €4 million, offset by an increase in net investments of €246 million, higher net interest paid of €57 million and higher net lease repayments of €56 million.

The accounting policies applied in these financial statements are consistent with those applied in Ahold Delhaize's 2024 financial statements, except as otherwise indicated below under "New and revised IFRSs effective in 2025."

Historical cost is used as the measurement basis unless otherwise indicated. The financial statements have been prepared on the basis of the going concern assumption.

#### **Risks and uncertainties**

Increased geopolitical volatility continues to present risks such as disruption to supply chains, cyber attacks, import tariffs, volatility in commodity prices, insecurity and elevated financial risks. We closely monitor these developments and determine the impacts on business, consumer trends, technology and data, the regulatory environment, people, organized labor and our financial position. Our monitoring activities include impact assessment as well as the implementation of measures to reduce these risks.

Ahold Delhaize's enterprise risk management program provides executive management with a periodic and holistic understanding of the Company's key business risks and the management practices, policies and procedures in place to mitigate these risks. Ahold Delhaize recognizes strategic, operational, financial, compliance and sustainability risk categories.

An integrated comprehensive analysis of the principal risks faced by Ahold Delhaize is included in the Risks and opportunities section of Ahold Delhaize's Annual Report 2024, which was published on February 26, 2025.

#### **Seasonality**

Under normal economic conditions, Ahold Delhaize's net sales are impacted by seasonal fluctuations, typically resulting in higher net sales and income in the days leading up to national holidays, such as Christmas and Easter, as well as the Fourth of July in the U.S.

#### New and revised IFRSs effective in 2025

The amendments to IAS 21, "The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability" became effective in the current financial year starting as of December 30, 2024. These amendments do not have an impact on the Company's interim condensed consolidated financial statements.

#### **Acquisition of Profi**

On December 4, 2024, Ahold Delhaize announced that the Romanian regulatory authorities had approved the acquisition of 100% of Romanian grocery retailer Profi Rom Food SRL (Profi) from MidEuropa. The acquisition more than doubles Ahold Delhaize's retail footprint in Romania, where it operates nearly 1,000 stores under the Mega Image brand. The combination will complement and expand Ahold Delhaize's existing Romanian footprint to better serve both urban and rural areas. The strong format fit and complementary customer propositions between the Profi and Mega Image brands will allow them to better serve the Romanian consumer, driving both sales growth and profitability. The acquisition was completed on January 3, 2025.

The preliminary purchase consideration was paid in cash and is derived from the preliminary financial accounts as provided by the seller upon acquisition date. As the preliminary financial closing accounts and certain valuation assessments still need to be finalized, the initial accounting is not yet completed and, therefore, considered provisional.

The provisional allocation of the fair values of the identifiable assets acquired, liabilities assumed and goodwill arising from the acquisition of Profi is presented in the table above. Other intangible assets mainly includes the Profi brand name, for an amount of €240 million. Other non-current financial liabilities and Other current financial liabilities mainly consist of lease liabilities.

The goodwill is attributable to the synergies expected from the combination of the operations and the ability to strengthen our presence in both urban and rural areas. The goodwill from the acquisition of Profi is not deductible for tax purposes.

Since the acquisition, Profi contributed net sales of €739 million to Q2 2025 (YTD 2025: €1,385 million) and had a modest negative impact on Q2 2025 and YTD 2025 net income.

#### 4. Segment reporting

Ahold Delhaize's retail operations are presented in two reportable segments. In addition, Ahold Delhaize Group (formerly "Global Support Office") is presented separately. Ahold Delhaize Group is not considered a reportable segment as it does not engage in business activities from which it may earn revenues.

The accounting policies used for the segments are the same as the accounting policies used for this summarized financial information, as described in *Note 2*.

#### 10. Financial instruments

On March 3, 2025, Ahold Delhaize announced that it successfully launched and priced a €500 million eight-year sustainability-linked bond, maturing on March 10, 2033. The bond was priced at 99.723% and carries an annual coupon of 3.250%. The settlement of the bond issue took place on March 10, 2025.

The bond was issued in accordance with Ahold Delhaize's Sustainability-Linked Bond Framework, updated in March 2024, and structured in accordance with the 2023 International Capital Market Association (ICMA) Sustainability-Linked Bond Principles.

The bond is linked to Ahold Delhaize achieving targets in 2030 on the following KPIs:

- 50% reduction in absolute scope 1 and 2 greenhouse gas (GHG) emissions compared to the financial year ending December 30, 2018 (the scope 1 and 2 GHG emissions baseline year)
- 30.3% and 42% reduction in absolute scope 3 forest, land and agriculture (FLAG) and energy and industrial (E&I) (non-FLAG) GHG emissions, respectively, compared to the financial year ending January 3, 2021 (the scope 3 FLAG and E&I GHG emissions baseline year)
- 50% reduction of food waste compared to the financial year ending January 1, 2017 (the food waste baseline year)

The sustainability-linked feature will result in a coupon adjustment of +50 bps if Ahold Delhaize's performance does not achieve one or more of the stated KPIs. The sustainability performance reference date is December 29, 2030. Any adjustment to the rate of interest, if applicable, shall take effect and accrue from the interest payment date immediately following March 10, 2031 (i.e., prospectively).

The carrying amount of trade and other (non-)current receivables, cash and cash equivalents, accounts payable, short-term deposits and similar instruments, and other current financial assets and liabilities approximate their fair values because of the short-term nature of these instruments and, for receivables, because any expected recoverability loss is reflected in an impairment loss.
